

An Industry-Leading Teleophthalmology Platform for Improved Management of Chronic Eye Disease Screening

iVision is a web-based a HIPAA compliant teleophthalmology platform used for screening of chronic eye diseases such as diabetic retinopathy, glaucoma, macular degeneration and retinopathy of prematurity. The solution integrates ocular imaging, clinical workflows and reporting into a single-source, Web-based solution. iVision provides all of the features necessary to manage the screening process including image capture, upload, diagnostic viewing, grading, clinical interpretation and structured reporting.

Features:

- Medical grade image viewer with image enhancement capabilities
- Screening workflow management
- Customizable interpretation forms
- Second opinion request
- Automated structured reporting
- Integrated scheduling & patient recall
- Peer review quality control
- Patient medical record
- Multi-level reading
- Automated alerts
- Compatible with all non-mydriatic fundus cameras and OCTs

Pioneers in Teleophthalmology

For over a decade, Retina Labs has been the proven innovator and market leader in cloud-based teleophthalmology. Unmatched within the industry, the iVision teleophthalmology suite meets the highest medical standards. Retina Labs iVision Solution is proudly recognized by the World Health Organization (WHO) as a breakthrough innovation in healthcare.
